RECOMMENDATIONS FOR HOME ISOLATION

1. Provide prevention measures and explain them to patients in home isolation also by using designs, charts or pictures.
2. Give also clear indications on alarm symptoms:
 - a. promote information;
 - b. diffusion of telephone numbers to call in case of occurrence of symptoms;
 - c. arrangements for support e.g. shopping.
3. Provide call centers, online chats, FAQs and video tutorials to consult when there is doubt.
